Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach a magnetic micro actuator having a groove and inclined surface formed in the substrate with a mirror coupled to torsion bar which is fixed to posts formed to a predetermined height and spaced apart on the substrate, where the groove includes an inclined contact surface contacting the lower-bottom surface of the mirror when the mirror is rotated by an external magnetic field. The mirror having a magnet for formed at one end of the mirror relative to said torsion bar and corresponding to the inclined contact surface and a reflective surface on the other end of the mirror, so that when the mirror contacts the inclined contact surface the reflective surface reflects light traveling parallel to a plane of said substrate by the mirror.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
